## EXO Tracer

The EXO Tracer is an industrial camera with a fully functional lens control (focus, zoom, aperture). Lens mount is a Micro Four Thirds (MFT) mount. The excellent thermal concept of the EXO qualifies for a operating temperature of up to 60°C.

The MFT beam geometry on the sensor side of the lens works in perfect harmony to the high sensitive Sony IMX sensors. A nearly perfect flatfield is the compelling result. Together with up to 72dB dynamic range and up to 12 MP resolution, the Tracer delivers excellent image quality.

Lens control and integrated strobe controller are integrated into the camera's GenICam 3.0 tree as properties. Any GenICam-driven software is immediately able to use lens control and strobe controller without additional drivers.
